

# Molly Bannon

Winchester High School

This body of work focuses on the art of painting. It is a series of photographs that demonstrate a painting being created. Although these times at home are challenging, it is a good chance to focus on one's hobbies or even start something new. I have recently taken an interest in painting outside. The beautiful weather provides scenery and a sense of freeness that lets the mind expand. As my sister painted, the bright colors caught my eye and I was inspired to take pictures as she worked. It opened my eyes to new angles and focal points.
