

We are thrilled to have the creativity of the Winchester Community Music School curate music to enhance the visual experience. Each cube has a QR code that links to a specially composed soundtrack for the photographs.

Working as a visual and metaphorical bridge between the Skillings and Shore Roads, a new site specific installation on the Shore Road Bridge, creatively conceived by Architect and Sculpturer, Mary McKenna with artwork by artist Stefanie Timmerman looks at the Aberjona Riverway, intersecting with our changing climate in an installation called *Aberjona - Plastic Eden*.

Photoville FENCE

The Griffin Museum is pleased to partner with Photoville and the Winchester Cultural District to bring the third annual Fence to Winchester, featuring 13 installations in photographic partnerships with the United Nations, Atlantic Magazine and Leica Camera USA, featuring the creativity and community of women and BIPOC artists alongside our local New England Photographic Community, highlighting the people and communities they inhabit.

Creating a photographic walking trail around Judkin's Pond, where the Griffin Museum is located, the Fence is a public photo installation showcasing national, international and New England artists. This year we also bring sidewalk art to downtown Winchester, featuring contemporary New England based photographic artists and featured images from the Arthur Griffin archives.
